

# Project Tracking Software

Six Sigma practitioners use project tracking software to monitor and report the status of their efforts. Products typically feature a dashboard that allows for easy access to the status of particular projects, as well as details on the resulting financial impact.

	Capabilities and Functionalities											Dashboard Capabilities							
	Ability to link to other projects	Project database	Knowledge database	Projects searchable by keyword	Online training module	Index-based "Help"	Data acquisition from other software	Multi-currency support	Multi-language support	ASP hosted	Enterprise hosted	Project suggestion area	Ability to track training by individual	Ability to track certification by individual	Financial tracking	Monitoring project deliverables	Setting project milestones	Tracking project phase status	Reporting project status

**MoreSteam.com**  
 Lawrence Goldman, 303-777-7171  
 lgoldman@moresteam.com

MoreSteam's TRACtion® is an affordable, Web based project management and tracking software for Lean Six Sigma deployments. Balancing power and simplicity, TRACtion includes management tools for project oversight and analysis and the functions Belts need to store and share critical project information. TRACtion automates project selection and integrates projects with training.

**SigmaFlow**  
 Jim Henry, 972-447-8340  
 jhenry@sigmaflow.com

As a leader in Business Process Intelligence, SigmaFlow combines methodology, industry and process management know-how to provide Template-based Project Portfolio Management for faster realization of project results, Toolkits for process analysis and optimization, and analysis-ready Measurements to ensure process improvement gains are sustained.

This directory provides information about the capabilities and functionalities of various software options, as well as the training included as part of their implementation packages. One factor not covered here is cost, which usually includes an initial setup fee and a per-set fee for each user; how a product is hosted also may affect price. Those considering purchasing software should contact providers directly.

Reporting Capabilities							Implementation	
Scorecard	Executive summary/ Storyboard output formats						Estimated time to go live enterprise-wide – includes specification and configuration, but not personnel training	Training included
	PDF	PowerPoint	Excel	Word	HTML	Other		
•	•	•	•	•	•	•	4 to 6 days	System administrator, project manager, resource manager and end-user training
•	•	•	•	•	•	•	7 to 10 days	Systems administration training, end-user as required
•	•	•	•	•	•	•	7 to 10 days	System administrator and end-user training
	•		•	•	•	•	1 to 3 days	Getting-started training materials
•	•	•	•	•	•	•	7 to 10 days	Full day of on-site, classroom-based administrator training; online help; end-user and administrator reference materials
•	•	•	•			•	1 to 3 days	On-site two-day training workshop organized by role and “day-in-the-life” use cases
•	•	•	•	•	•	•	7 to 10 days	System administrator, end-user and managerial training

*About the guide:* Details about the software programs were supplied by the providers in response to a questionnaire sent by iSixSigma Magazine editorial staff; the editors have not reviewed any project tracking software and do not endorse any particular programs. Some providers did not submit information in time for inclusion. Please contact editor@isixsigma-magazine.com to be added to our contact list.
